Good morning,

Thank you for registering for the Midwest Glacial Lakes Partnership Lake Conservation Webinar, "A Field Study of Maximum Wave Height, Total Wave Energy, and Maximum Wave Power Produced by Four Recreational Boats on a Freshwater Lake" presented by Jeff Marr and Andy Riesgraf.

In case you missed the presentation or want to share it, we've posted a recording of the webinar on YouTube. You can find it along with all previous webinars archived on our website:

<http://midwestglaciallakes.org/resources/webinars/#archives>. I have also cc'ed our presenters to this email in case you have follow-up questions for them. If you'd like to access the report referenced in our discussion, you can do so at: [A Field Study of Maximum Wave Height, Total Wave Energy, and Maximum Wave Power Produced by Four Recreational Boats on a Freshwater Lake \(umn.edu\)](#). You can follow along with Jeff and Andy's wake boat research at their project website: [Healthy Waters Initiative website](#)

Thanks for all that you do for our lakes.

Joe
